

# ElaBand Product Category Ingredient Analysis

Category-based analysis of 3 key products from Naumcare

Regeneration

Soothing

Moisturizing

Barrier Protection

Brightening

# Product Lineup & Overview

## Target Products for Analysis

### Crystal PDRN + Snow Spicule Cream

Spicule Strong - 50 ingredients

Contains Hydrolyzed Sponge (3 million pieces), Sodium DNA (PDRN)

### Crystal PDRN + Snow Spicule Cream Mild

Mild - 47 ingredients

Contains Hydrolyzed Sponge, Sodium DNA (PDRN), Sodium Hyaluronate Crosspolymer

### Crystal Aura Serum Exo+ Boost

Port Marigold Serum - 46 ingredients

Contains Calendula Officinalis Flower Water, Propolis Extract, Honey Extract, etc.

## Category-Based Ingredient Analysis

The following shows the analysis of key ingredients from each product categorized into 5 functional groups.

- Regeneration- Ingredients promoting damaged skin recovery and cell regeneration
- Soothing- Ingredients calming skin and reducing irritation
- Moisturizing- Ingredients providing hydration and moisture retention
- Barrier Protection- Ingredients strengthening and protecting skin barrier
- Brightening- Ingredients improving skin tone and whitening

This analysis was conducted based on accurate ingredient information provided in the Word file, focusing on identifying the unique characteristics of each product as dual-functional cosmetics for whitening and anti-wrinkle effects.

# Crystal PDRN + Snow Spicule Cream

50 ingredients categorized by function

## + Regeneration 6

6 ingredients - key ingredients 4

Hydrolyzed Sponge      Sodium DNA(PDRN)

*Special feature: Strengthens skin barrier*

## + Other Ingredients 16

16 ingredients - key ingredients 3

Purified Water Essential Oils Plant Extracts

# Summary & Key Features

Comparison of key advantages and recommended usage for 3 products

## Crystal PDRN + Snow Spicule Cream

Strong Type | 50 ingredients

Regeneration   Barrier   Brightening

### Key Advantages

Contains 3 million hydrolyzed sponge spicules (physical stimulation)  
PDRN 5,000ppm (marine DNA for tissue regeneration)  
Glycerin & oils (moisture retention)

### Optimal Usage

For damaged skin, intensive repair, evening use, combination with light moisturizers

### Usage Tips

Apply in the evening after cleansing. For intensive treatment, use 2-3 times weekly with gentle massage.

## Crystal PDRN + Snow Spicule Cream Mild

Mild Type | 47 ingredients

Regeneration   Soothing   Moisturizing

### Key Advantages

Contains 1 million hydrolyzed sponge spicules (gentle stimulation)  
PDRN (marine DNA for tissue regeneration)  
Hyaluronic acid & olive-derived emulsifiers (hydration & barrier)

### Optimal Usage

For sensitive skin, daily maintenance, morning use, combination with serums

### Usage Tips

Apply morning and evening after serum. For sensitive skin, start with small amount and gradually increase usage frequency.

## Crystal Aura Serum Exo+ Boost

Calendula Flower Serum | 46 ingredients

Soothing   Moisturizing   Brightening

### Key Advantages

Contains 100 million Asparagus Exosomes  
Propolis & calendula extracts (soothing, anti-inflammatory)  
Advanced hydration system (moisture retention)

### Optimal Usage

For irritated/sensitive skin, use under moisturizer, suitable for all skin types

### Usage Tips

Apply 2-3 pumps before moisturizer. Can be layered for intensive hydration. Use AM and PM for best results.

## Recommended Product Combinations

Normal Skin Morning: Mild Cream → Evening: Strong Cream

Sensitive Skin Focus on Mild Cream + Strong Cream 1-2× weekly

Oily/Combination Skin Serum as primary product + cream as needed
